

WESTEASE INTERNATIONAL 110 - 2013 EDITION

Construction: The hull and deck are vacuum-bagged PVC foam/E-glass composite laminated with a high performance modified epoxy resin structurally engineered to provide maximum stiffness and lasting performance. The exterior and cockpit finish are premium gelcoat for durability and high resistance to ultra violet degradation. The cockpit has integrated contoured combings for comfort and easy maintenance. Bow launching spinnaker tube drains into self-bailing cockpit. Sealed cockpit sole and bulkheads assure full self-rescuing capabilities. Rudder is composite construction installed with Harken bearings to minimize steering friction.

Rigging/Hardware: Keel stepped mast including trapeze, running and standing rigging with a roller furling headstay. Race equipped with Harken hardware.

Base Price: \$29,600
